

**Honors Physiology**  
**The Nervous System**  
**Neuroglia**

Name: \_\_\_\_\_

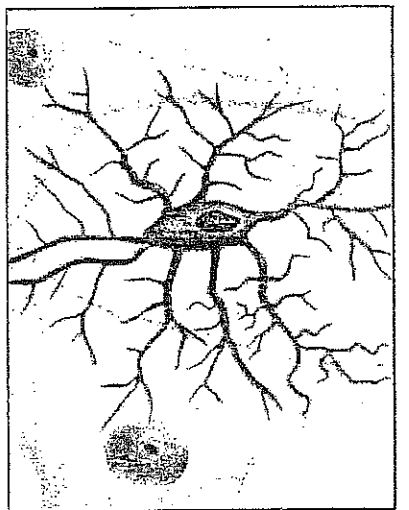

Period: \_\_\_\_\_ Date: \_\_\_\_\_

	Type of Neuroglia	CNS or PNS
Produce myelin in PNS		
Anchor neurons to nutrient supply		
Monitor neuron health		
Can be squamous, columnar, or ciliated		
Circulate cerebrospinal fluid		
Produce myelin sheaths for insulation in CNS		
Resemble moons around planet		
Star-shaped		
Phagocytizes invading microorganisms		
Important in regeneration of damaged nerves		
Small with thorny processes		
Cover capillaries		
Function largely unknown		
Control chemical environment
