

When you are finished, read the Introduction *I Love Music and I Love Science – Why Would I Want to Mix the Two?* (Pages 1-12) And answer the questions on the following page.

1. What types of artistic outlets do you enjoy?

2. What is your familiarity/ background with music? (Ex. You read music fluently and have played piano for 10 years, or you're simply a karaoke fanatic ;))

3. What are your interests/ concerns in reading this book after reading the introduction? What are you excited to take away from the nervous system unit?

4. Do you have a *taste* in music? If so, what is it? Do you ever branch outside of that taste? Why or why not?

5. Think of a song that you associate with a memory or sincere feeling, and describe it below:
Ex. Every time I hear the song "For the Longest Time" by Billy Joel, I think of one of my best friends who covered it in our a cappella group. He passed away a few years ago, so whenever I hear the song I think of him on stage singing it to the crowd.
